CAREER OBJECTIVE

Motivated Computer Engineering Student with hands-on experience in Python, Generative AI, Agentic AI, AI-powered applications. Skilled in building RAG systems, AI agents, and intelligent automation solutions using modern AI frameworks and APIs. Seeking entry-level opportunities as a Junior Generative AI Engineer, AI Developer, or Python Developer to apply technical skills, contribute to real-world projects, and grow in a technology-driven organization.

EXPERIENCE

PHP Full Stack Developer Intern | KATARE INFORMATICS

Dec 2025 – Feb 2026 | Solapur, Maharashtra, India

- Developed dynamic, database-driven web applications using PHP, MySQL, HTML, CSS, and JavaScript.
- Built and implemented full-stack features including CRUD operations, authentication systems, form validation, and database integration. Collaborated with development teams on testing, debugging, performance optimization, and SDLC-based project development.
- Developed real-world business applications, including a Milk Shop Management System and a Mobile Customer Care Management System.
- Key Technologies: PHP, MySQL, HTML, CSS, JavaScript, Database Design, CRUD Operations, SDLC.

EDUCATION

Computer Engineering | SPM Polytechnic, Solapur

CGPA – 8.6 | 2026

X (SSC) | Matoshri Janbai Janardan Bitala Prashala, Solapur

Percentage – 71% | 2023

TECHNICAL SKILLS

- Programming Languages : Python, Java.
- Artificial Intelligence : Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG), LangChain, Vector Embeddings, Qdrant Vector Database, API Integration, Google Gemini API, OpenAI API, Prompt Engineering, Tool Calling, Telephone Agents, Voice Agents.
- Web Technologies : HTML, CSS, JavaScript, PHP, MySQL.
- Frameworks / Libraries : FastAPI , Streamlit, NumPy, Pandas, Matplotlib, Scikit-learn.
- Tools & Version Control : Git & GitHub, Docker, VS Code, Jupyter Notebook.

PROJECTS

Retrieval-Augmented Generation (RAG) PDF Chatbot | <https://github.com/shriprabhu-nilur/rag-pdf-chatbot>

- Built an intelligent PDF Question-Answering system using Retrieval-Augmented Generation (RAG) with LangChain, OpenAI APIs, and Qdrant for semantic search and context-aware response generation.
- Designed and implemented document retrieval pipeline, including PDF ingestion, text chunking, embedding generation, vector storage, and real-time conversational querying to enhance information retrieval accuracy and user interaction.

Weather Agent | <https://github.com/shriprabhu-nilur/weather-agent>

- Developed an AI-based weather assistant agent that retrieves real-time weather information based on user input by automatically calling external APIs to fetch updated weather details.
- Implemented an automated weather data retrieval agent, demonstrating the practical application of Agentic AI concepts for real-time information processing and user interaction.

Generative AI Nutritionist Assistant | <https://github.com/shripabhu-nilur/genai-nutritionist-assistant>

- Developed an AI-powered Nutritionist Assistant using Large Language Models (LLMs) to provide personalized dietary recommendations, meal plans, and nutrition guidance based on user preferences and health goals.
- Implemented prompt engineering and context-aware response generation to deliver accurate nutritional insights, food suggestions, and interactive health consultations through a conversational AI interface.

AI Voice Agent for Customer Interaction | <https://github.com/shripabhu-nilur/telephone-voice-agent>

- Developed an AI-powered Voice Agent using Twilio and Large Language Models (LLMs) to automate customer interactions through real-time voice conversations, appointment scheduling, and support services.
- Integrated speech-to-text, text-to-speech, and telephony workflows to enable natural, human-like communication while reducing manual intervention and improving customer engagement.

Generative AI Resume ATS Analyzer | <https://github.com/shripabhu-nilur/resume-ats-system>

- Developed an AI-based Applicant Tracking System (ATS) analyzer using Google Gemini API and Streamlit to evaluate resumes against job descriptions through intelligent matching and scoring.
- Implemented resume upload and parsing functionality with automated keyword analysis, match percentage calculation, and AI-generated feedback to optimize resumes for recruitment systems and job applications.

Milk Shop Management System Web Portal (AWARD PROJECT)

Dec 25 to Febr 26

<https://github.com/shripabhu-nilur/Milk-Shop-Management-System>

<https://primecloud.live/mybillbook/>

- Developed a web-based Milk Shop Management System to manage customer records, generate invoices, and store customer & billing data with QR code-based customer identification.
- It can be useful for real-world application, Recognizing its practical implementation and usability.

ACHIEVEMENTS

- Presented the **Milk Shop Management System** Web Portal at **DIPEX 2026**.
- Received the **ISP Award** for its practical implementation and usability.
- **Best Achievement Award**, SPM Polytechnic, Solapur (2026)

CERTIFICATIONS

- Pillars of Effective Communication — LinkedIn Learning (2025)
- Full Stack Generative AI & Agentic AI — Udemy (2026)
- Milk Shop Management Web Portal — DIPEX State Level Maharashtra

LANGUAGES

Hindi, Telugu , Marathi — Fluent

English , German — Intermediate
