CAREER OBJECTIVE

Motivated Computer Engineering diploma student with hands-on experience in Python, web development, and AI-based applications. Seeking an entry-level Software Developer or Python Developer role to apply technical skills and build practical software solutions.

EDUCATION

Computer Engineering Diploma | SPM Polytechnic, Solapur

CGPA – 8.5 | 2026

XII (SSC) | Matoshri Janbai Janardan Bitala Prashala, Solapur

Percentage – 71% | 2023

TECHNICAL SKILLS

- Programming Languages : Python, Java
- Generative AI & Agentic AI : API Integration, Google Gemini API, OpenAI API Integration, Prompt Engineering Function Calling, API-based Agents .
- Web Technologies : HTML, CSS, JavaScript, PHP, MySQL
- Frameworks / Libraries : Streamlit, NumPy, Pandas ,Matplotlib, Scikit-Learn.
- Tools & Version Control : Git & GitHub, VS Code, Jupyter Notebook

PROJECTS

Generative AI Invoice Extractor App

- Overview : Developed a Generative AI-based invoice processing application that extracts structured data such as invoice number, date, and total amount from uploaded invoice images.
- Technology : Python, Streamlit, Google Gemini API, Prompt Engineering
- Outcome : Automated invoice data extraction and simplified document processing, reducing manual effort and improving data accuracy.

Milk Shop Management System Web Portal (Award Project)

Dec 25 to Feb 26

- Overview : Developed a web-based Milk Shop Management System to manage customer records, generate invoices, and store customer & billing data with QR code-based customer identification.
- Technology : PHP, MySQL, HTML, CSS, JavaScript, QR Code Integration
- Outcome : It can be usefull for real would use application ,Recognizing its practical implementation and usability.

Weather Agent (Agentic AI Project)

- Overview : Developed an AI-based weather assistant agent that retrieves real-time weather information based on user input. The agent automatically calls external APIs to fetch updated weather details.
- Technology : Python, API Integration, Function Calling, Agentic Workflow
- Outcome : Implemented an automated agent capable of retrieving live weather data, demonstrating practical usage of Agentic AI concepts.

Q&A Chatbot with Chat History

- Overview : Built an interactive chatbot application capable of answering user queries while maintaining chat history. The chatbot provides dynamic responses using LLM APIs.
- Technology : Python, Streamlit, Google Gemini API , Session State Management
- Outcome : Enabled continuous user interaction with stored chat history, improving usability and conversational experience.

Machine Learning Classification Web App

- Overview : Created a machine learning classification model to predict output categories based on input data and deployed the model as an interactive web application.
- Technology : Python, Machine Learning Algorithms, Streamlit, NumPy, Pandas
- Outcome : Successfully deployed a machine learning model as a user-friendly web application, enabling real-time predictions.

ACHIEVEMENTS

Presented the Milk Shop Management System Web Portal at DIPEX 2026.

Received the ISP Award for its practical implementation and usability.
